

Master Controller Dashboard

Logic & Calculation Document

LabWise LIMS

9 April 2026

Role Overview

The Master Controller is the approval authority over master data. They review STPs, analytes, generic masters, standards, and products created by the Master Personnel. Their primary action is Approve or Reject.

Key difference from Master Personnel: Master Personnel creates data, Master Controller approves it. Same modules, but with Approve permission added on Analyte Master, STP Master, and Generic Master.

Stats Strip

Approved Today

Count of AuditLog where userId = this user, action = approve, entity in master entities, createdAt = today.

Rejected Today

Count of AuditLog where userId = this user, action = reject, same filters.

Pending Approval

Count of TestMaster where isActive = true AND (specification or method is null/empty). Proxy for items needing review.

Reviewed / Month

Total approved + rejected AuditLog entries this month.

Data Quality

% of TestMasters with all critical fields filled (method, spec, limits, standard).

KPIs (5 Metrics)

KPI	Target	What It Measures	Source
Reviewed / Month	80	Total STPs reviewed (approved + rejected)	AuditLog (approve + reject)
Approved / Month	70	STPs approved this month	AuditLog (approve only)
Rejection Rate	10%	% of reviews that were rejections (inverse)	rejected / total reviewed x 100
Pending Review	0 (inverse)	Incomplete STPs awaiting action	TestMaster (missing spec/method)
Data Quality	98%	% of tests fully complete	TestMaster field completeness

KRAs (4 Weighted Areas)

KRA	Target	Weight	Calculation
Review Throughput	80/mo	30%	reviewed / 80 target x 100
Data Quality Oversight	98%	25%	% of tests with spec + method + limits + standard
NABL Compliance	100%	25%	% of tests with isAccredited = true
Review Turnaround	95%	20%	Placeholder -- needs SLA tracking

Overall KRA Formula

(Throughput Score x 0.30) + (Quality Score x 0.25) + (NABL Score x 0.25) + (Turnaround Score x 0.20)

Approval Queue

Shows all active TestMaster records sorted by createdAt descending. Each test shows:

- Name, code, department
- Linked standard (or "Not linked")
- Parameter count
- Issues: missing method, spec, standard, limits, parameters
- Approve / Reject action buttons

Alerts

Alert	Trigger	Severity
Pending Review	TestMaster missing spec or method	Amber
No Standard	TestMaster with standardId = null	Red
Not NABL Accredited	TestMaster with isAccredited = false	Amber

Auto-Refresh

Data	Refresh	Stale
Stats, Queue, Alerts, Reviews	60 seconds	30s
KPIs, KRAs	5 minutes	60s

Data Sources

What	Table
Approval/rejection activity	AuditLog
Test completeness, issues	TestMaster
Parameters count	TestParameter
Standards linkage	Standard
